DETAILED ACTION

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 11/7/08 has been entered.
2. The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.
3. Claims 1-3, 6, 8, 18-20, 23 and 25, are rejected under 35 U.S.C. 103(a) as being unpatentable over Sakemi et al (US 5,655,704) in view of US provisional application No. 60/078472 to Fjelstad and further in view of Dyce et al (4209893). This rejection is set forth in Prior Action, paragraph 3.

Response to Arguments

4. Applicant's arguments have been acknowledged but are not persuasive for same reasons provided from record. Furthermore, regarding to applicant's argument that there is no suggestion to combine the references, the examiner recognizes that obviousness can only be established by combining or modifying the teachings of the prior art to produce the claimed invention where there is some teaching, suggestion, or motivation to do so found either in the references themselves or in the knowledge

generally available to one of ordinary skill in the art. See *In re Fine*, 837 F.2d 1071, 5 USPQ2d 1596 (Fed. Cir. 1988) and *In re Jones*, 958 F.2d 347, 21 USPQ2d 1941 (Fed. Cir. 1992). In this case, the combination references teaches the invention and the motivation for the combination can be obtain from either references because each references directed to solder delivering and mounting system (i.e., see Sakemi et al, about col. 1, lines 50-55 or .Fijelstad as discussed in the abstract as well as the Dyce et al at col. 2, lines 10-12). Note that the Examiner relies on the Dyce reference only for their teaching of "a hopper having side walls formed at a continuous uninterrupted angle extending from an upper opening at the top of the hopper ".

Allowable Subject Matter

5. Claims 5 and 22 appear to be overcome the cited prior art references . These Claims are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in to each independent claims including and any intervening claims.
